PREFACE

Success in examinations depends on proper planning of studies and appropriate selection of study materials. The pattern of examinations become tough. This is the reason that a right choice of study materials plays a very important role. This book cover thoroughly all the basics of the whole course as well as present to the examinee a wide spectrum of the multiple choice questions having a huge variety. The author has made a sincere attempt in this direction in the present book. Various unique features of the book are as under for example :

- A brief review of concepts at a glance covering all fundamentals and important conclusions are given at the start of every chapter.
- Chapters are classified under different units.
- Multiple choice questions in every chapter are arranged in a systematic and sequential way covering the whole text and spectrum of the chapter.
- Answers are provided at the end of every chapters.
- **Model Test Papers** covering the whole syllabus are also provided at the end of the book again with their answers. These papers will prove to be fit for examination and provide a chance to students in assessing their level of preparation.

The present book is self-sufficient in all respects.

I am thankful to my wife Mrs. Rita Mishra who has put a hard labour in reading the proofs thoroughly and pointing out errors and omissions. My sincere thanks are also to publisher Mr. Mahendra Jain who gave me a chance to write this type of books. This edition is a nice form.

Although all attempts have been made to avoid errors and printing mistakes, but omissions are a human weakness and, therefore, constructive suggestions, modifications and errors brought to my notice will be highly appreciated and incorporated in the next edition.

— *Pramod Kumar Mishra*

Contents

1. Basic Electrical Engineering	3 – 19
2. The Network Analysis	20 – 23
3. Basic Material used in Electrical Machines	24 – 26
4. A. C. Circuit	27 – 37
5. Testing of D.C. Machine	38 – 39
6. D.C. Generator and D. C. Motors	40 – 51
7. Illumination	52 – 59
8. Electric Heating and Welding	60 – 68
9. Electrolysis and Storage Batteries	69 – 77
10. Electromagnet	78 – 79
11. Alternator	80 – 88
12. Power Plant Engineering	89 – 96
13. Instruments and Measurements	97 – 105
14. Control System	106 – 112
15. Industrial Drives	113 – 116
● Model Test Papers	117 – 143
– Model Set 1	117
– Model Set 2	122
– Model Set 3	127
– Model Set 4	133
– Model Set 5	138
