
Contents

ALGEBRA

1. Theory of Equations and Symmetric Functions of the Roots	3–14
2. Progressions (A.P., G.P. & H.P.).....	15–24
3. Exponential and Logarithmic Series.....	25–28
4. Permutations and Combinations.....	29–36
5. Binomial Theorem.....	37–40
6. Matrices and Determinants.....	41–62
7. Sets and Set Theory.....	63–66
8. Relations and Functions.....	67–70
9. Number Theory.....	71–76
10. Group.....	77–85
11. Linear Algebra.....	86–91
12. Probability.....	92–100

GEOMETRY

Section–I : Analytical Plane Geometry

1. Pair of Straight Lines.....	101–104
2. The Circle.....	105–116
3. The Parabola.....	117–123
4. The Ellipse.....	124–132
5. The Hyperbola.....	133–141
6. Polar Equations.....	142–147

Section–II : Analytical Solid Geometry

7. Fundamental Concepts of 3-D.....	148–154
8. The Plane.....	155–160
9. The Straight Line.....	161–168
10. The Sphere.....	169–176
11. The Cone.....	177–183
12. The Cylinder.....	184–190

TRIGONOMETRY

● Trigonometrical Ratios and Identities.....	191–192
● Trigonometrical Equation.....	193–193
● Properties of Triangles.....	193–194
● Height and Distance.....	195–195
● Inverse Circular Functions.....	195–196
● Hyperbolic Functions.....	196–197
● Complex Number and DeMoivre’s Theorem.....	198–213
● Miscellaneous Exercise.....	214–239

CALCULUS

Section–I : Differential Calculus

1. Function.....	240–245
2. Limit, Continuity and Differentiability.....	246–258
3. Rolle’s Theorem, Mean Value Theorem, Taylor’s Theorem.....	259–264
4. Tangents and Normals.....	265–272
5. Maxima and Minima.....	273–279
6. Curvature.....	280–286
7. Asymptotes.....	287–293
8. Curve Tracing.....	294–301
9. Partial Differentiation.....	302–310
● Miscellaneous Exercise.....	310–315

Section–II : Integral Calculus

10. Indefinite Integrals.....	316–328
11. Definite Integrals.....	329–339
12. Rectification, Quadrature, Volume and Surfaces.....	340–353
13. Multiple Integration.....	354–363

Differential Equations

Differential Equations.....	364–386
● Definition	
● Differential Equations of First Order and First Degree	
● Differential Equations of First Order but not of First Degree	
● Equation Solvable for p , x and y	

- Clairaut's Equation
- Geometrical Meaning of a Differential Equations of the First Order
- Singular Solution
- Determination of Singular Solution
- Trajectory
- Orthogonal Trajectories
- Linear Differential Equations with Constant Coefficients
- Solution of the Differential Equation
- Particular Integral (P.I.)
- Methods of Finding Particular Integral

Vector Algebra

Vector Analysis..... 387–408

- Scalar and Vector Quantities
- Unit Vector
- Equal Vectors
- Position Vector
- Addition of Vectors
- Properties of Addition
- Subtraction of Vectors
- Multiplication of a Vector by a Scalar
- Properties of Scalar Multiplication
- Position Vector of a Point Dividing a Line in a given Ratio
- Collinear Vectors
- Linearly Independent and Dependent System of Vectors
- Coplanar Vectors
- Vectorial Equation of a Line
- Bisectors of the Angles between Two Straight Lines
- Condition for Three Points to be Collinear
- Vectorial Equation of a Plane
- Condition for Four Points to be Coplanar
- Components of a Vector
- Scalar or Dot Product of Two Vectors
- Properties of Scalar Product
- Vector or Cross Product of two Vectors
- Scalar Triple Product
- Properties of Scalar Triple Product

- Vector Triple Product
- Reciprocal System of Vectors
- Properties of Vector Product
- Properties of Reciprocal System of Vectors
- Scalar Product of Four Vectors
- Vector Product of Four Vectors
- To Find Perpendicular Distance of a Given Point from a Given Line

DYNAMICS

1. Velocity, Acceleration and Rectilinear Motion.....	409–415
2. Motion Under Gravity.....	416–422
3. Projectiles.....	423–430
4. Impulse, Work, Power and Energy.....	431–437
5. Collision of Elastic Bodies.....	438–444
6. D’Alembert’s Principle (Equations of Motion of a Rigid Body).....	445–452
7. Moment of Inertia.....	453–460

STATICS

1. Equilibrium of Three Forces Acting on a Particle.....	461–467
2. Equilibrium of More Than Three Forces Acting on a Particle.....	468–470
3. Equilibrium of Three Forces Acting on by a Rigid Body.....	471–482
4. General Conditions of Equilibrium.....	483–485
5. Centre of Gravity.....	486–496
