Part 'A' General Aptitude..... 1-92

Part 'B' & 'C'

UNIT-I

MOLECULES AND THEIR INTERACTION RELEVANT TO BIOLOGY

Biomolecules	3-24
Carbohydrates	3
Lipids	6
Protein	10
Nucleic acids	12
Double-helix model of DNA.....	13
RNA (Ribonucleic Acid).....	16
Vitamins	17
Practice Questions.....	24
Stabilizing Interaction in Biomolecules	25-33
Van der Waals interactions.....	25
Hydrogen bonding	29
Hydrophobic interactions.....	31
Disulphide bond.....	32
Practice Questions.....	33
Principle of Biophysical Chemistry	34-42
pH.....	34
Buffer Solution.....	35
Reaction Kinetics	37
Thermodynamics.....	38
Thermodynamic Processes.....	39
Gibbs Free Energy	40
Practice Questions.....	42
Enzymes	43-63
Principles of Catalysis.....	43
Structural organization of enzymes.....	45
Classification of enzymes	48
Mechanism of enzyme catalysis	48
Michaelis-Menten kinetics.....	50
Linear transform of Michaelis-Menten plot	52
Enzyme inhibition.....	53
Enzyme regulation	56
Isozymes	61
Abzymes	61
Practice Questions.....	62
Conformation of Proteins	64-84
Amino acids	64
Titration of amino acids	67
Hierarchical structure of proteins.....	70
Ramachandran plot	72
Collagen	75
Motifs	78
Protein denaturation.....	81
Proteases	81
Practice Questions.....	83
Carbohydrates Metabolism	85-101
Glycolysis	85
Fate of pyruvate	89

Krebs cycle.....	90
Electron Transport Chain	91
Inhibitors of Electron Transport Chain	94
Coupled reactions.....	95
Biological energy transducers.....	95
Oxidative pentose phosphate pathway	96
Gluconeogenesis	97
Glycogenolysis.....	98
Glycogenesis	99
Practice Questions.....	100
Lipid Metabolism	102-109
Lipogenesis	103
Fatty Acid Synthase (FAS).....	104
Fatty Acid Oxidation.....	104
β -Oxidation of odd numbered fatty acids	106
Cholesterol synthesis	107
Practice Questions.....	109
Metabolism of Amino Acids	110-115
Catabolism of amino acids.....	111
Ornithine Cycle.....	112
Biosynthesis of amino acids.....	113
Practice Questions.....	115
Nucleotide Metabolism	116-120
Pathways of nucleotide biosynthesis	116
THF Cycle in Nucleotide Biosynthesis.....	120
Practice Questions.....	120
Nucleic Acid Conformations	121-128
B-form DNA	121
A-form DNA	121
Z-form DNA	121
Comparison of A-DNA, B-DNA and Z-DNA.....	122
Secondary structure of RNA	123
tRNA	125
Micro-RNA	126
Practice Questions.....	128

UNIT-II

CELLULAR ORGANIZATION

Cell Organization in Living World	129-137
Evolution of Cell.....	129
Endosymbiosis	129
Discovery of Cell	130
Cell Theory	130
A comparative account of Prokaryotic and Eukaryotic cells	132
Structural Organization of Prokaryotic Cell	132
Gram-positive and Gram-negative bacteria	134
Structural Organization of Eukaryotic Cell	135
Plant versus animal cell	136
Practice Questions.....	137

Membrane Structure and Function	138-157	Meiosis	225
Structural Organization of Biomembranes	138	Practice Questions.....	228
Types of membrane lipids	140	Microbial Physiology	230-246
Lipid raft	143	Growth yield and characteristics of microbes.....	230
Classification of membrane proteins.....	144	Measurement of microbial growth.....	231
Glycocalyx	145	Batch culture.....	231
Membrane permeability	145	Fed-batch culture technique	231
Transport across membrane	146	Continuous culture technique	231
Tools and techniques to study the biomembrane	153	Synchronous growth of microbes	231
Practice Questions.....	155	Microbial fermentation	232
Structural Organization of Cell and Intracellular Organelles	158-176	Strategies of cell division in microbes	237
Cell Wall	158	Bacterial Population Growth Curve.....	238
Nucleus	161	Genetic Recombination in Bacteria	238
Mitochondria.....	164	Viruses.....	240
Plastids	166	Bacteriophages	241
Peroxisomes	167	Phytoplasma.....	243
Endoplasmic Reticulum	168	Actinomycetes.....	243
Golgi Apparatus	169	Sporulation in bacteria	244
Lysosomes.....	171	Practice Questions.....	245
Vacuole.....	173		
Ribosomes.....	174	UNIT-III	
Practice Questions.....	176	FUNDAMENTAL PROCESSES	
Protein Sorting	177-188	DNA Replication	247-258
Signal Sequences And Sorting Receptors.....	177	Unit of replication	247
Co-translational Protein Sorting to ER	178	Prokaryotic replicon.....	248
Post-translational Protein Sorting to Chloroplast	183	θ (theta) model of DNA replication	248
Protein Sorting to Peroxisome	183	Eukaryotic Replicons	249
Protein sorting to nucleus.....	184	Semiconservative mode of DNA replication	250
Post Translational modification of Protein in ER lumen	185	Proteins and enzymes involved in DNA replication.....	251
Transport to Golgi Apparatus.....	186	Prokaryotic DNA Polymerase Types and Function	251
Practice Questions.....	187	Eukaryotic DNA Polymerase Types and Function	252
Cytoskeleton and Intracellular Dynamics	189-200	Mechanism of DNA replication.....	254
Microtubules	190	Fidelity of DNA Replication	255
Microtubule-associated proteins (MAPs)	190	Extrachromosomal Replicons.....	256
Microtubule dynamics	191	Telomere Replication	256
Microtubule catastrophe.....	191	Practice Questions.....	258
Microtubule rescue.....	192	DNA Damage and Repair Mechanisms	259-265
Functions of Microtubules	192	Types of DNA damages	259
Intermediate Filament	194	DNA damage repair mechanisms.....	260
Microfilaments (Actin Filaments).....	195	Practice Questions.....	265
Practice Questions.....	199	RNA Synthesis and Processing	266-290
Organization of Genes and Chromosomes	201-215	Central dogma of molecular biology	266
Operon.....	201	Transcription	266
Repetitive DNA sequences	202	General Transcription Factors (GTFs).....	267
Interrupted genes.....	204	Prokaryotic RNA polymerase	268
Pseudogenes.....	204	Eukaryotic RNA polymerases.....	269
Gene families	205	Transcriptional units	270
Chromatin Organization.....	206	Mechanism of Prokaryotic Transcription.....	272
Chromosome banding techniques.....	206	Mechanism of eukaryotic transcription	275
Packing of DNA in Eukaryotic Cells.....	207	Chromatin Structure and Modifications.....	277
Nucleosome.....	207	Chromatin Remodeling.....	277
Histones Proteins	209	Processing of HnRNA in eukaryotes	279
Transposons	210	Spliceosomes	284
Practice Questions.....	214	Molecular mechanism of splicing.....	284
Cell Cycle	216-228	RNA Editing.....	287
Steps in Cell Cycle.....	216	mRNA transport from nucleus to cytoplasm	289
Cell-cycle control system	218	Practice Questions.....	290
Cell cycle checkpoints	220	Protein Synthesis and Processing	291-308
Mitosis.....	222	Ribosomes	291
Cytokinesis.....	224	Messenger RNA template	292
		Aminoacylation of tRNA	294
		Prokaryotic translation	294

Translational proof-reading in prokaryotes.....	298	Cell adhesion molecules	369
Prokaryotic translational inhibitors	298	Hematopoiesis	370
Molecular mechanism of eukaryotic translation.....	299	Practice Questions.....	374
Translational proofreading in eukaryotes	301	Cancer	376-392
Eukaryotic translational inhibitors.....	302	Cancer and the cell cycle	377
Genetic code.....	302	Tumour suppressor genes.....	377
Practice Questions.....	307	Proto-oncogenes.....	380
Gene Regulation.....	309-332	Interaction of cancer cells with normal cells	385
Strategies of gene regulation in prokaryotes.....	309	Apoptosis	387
Inducible Gene Regulation	309	Practice Questions.....	392
Repressible Gene Regulation.....	310	Immunology	393-446
Lac operon	310	Components of the Immune System.....	393
Trp operon.....	315	Toll-Like Receptors (TLRs) : Key Sensors of the Innate	
Gene regulation in bacteriophages	320	Immune System	402
Levels of gene regulation in Eukaryotes	323	Antigenicity.....	408
Practice Questions.....	331	Immunogenicity	408

UNIT-IV

CELL COMMUNICATION AND CELL SIGNALING

Host Parasite Interaction	333-345
Characteristics of Parasites	333
Recognition and entry processes of bacteria into animal host cells.....	338
Recognition and entry Processes of bacteria into plant host cells.....	338
Recognition and entry processes of viruses into plant host cells.....	339
Alteration of host cell behaviour by pathogens	340
Bacterial diseases in animals and their causal agents	341
Viral diseases in animals and their causal agents.....	341
Fungal diseases in animals and their causal agents	342
Protozoan diseases in animals and their causal agents	342
Helminth diseases in animals and their causal agents	342
Bacterial diseases in plants and their causal agents	343
Viral diseases in plants and their causal agents	343
Fungal diseases in plants and their causal agents	343
Cell-cell fusion in normal cells	343
Cell-cell fusion in abnormal cells	344
Practice Questions.....	344
Cell Signaling	346-363
Steroid hormones and their receptors	347
Cell surface receptors	351
G Protein-coupled Receptors (GPCRs)	351
G Proteins.....	352
Receptor tyrosine kinases (RTKs)	354
Wnt signaling.....	358
Hedgehog signalling pathway.....	359
Bacterial two-component system of signal transduction	359
Plant Two-Component Systems.....	360
Bacterial chemotaxis.....	360
Quorum sensing	361
Practice Questions.....	362
Cellular Communication and	
Cell Junctions.....	364-375
Cell Junctions.....	364
Tight Junctions.....	365
Adherens Junctions	365
Desmosomes	366
Hemidesmosomes	367
Gap Junctions.....	367
Plasmodesmata.....	368

Cell adhesion molecules	369
Hematopoiesis	370
Practice Questions.....	374
Cancer	376-392
Cancer and the cell cycle	377
Tumour suppressor genes.....	377
Proto-oncogenes.....	380
Interaction of cancer cells with normal cells	385
Apoptosis	387
Practice Questions.....	392
Immunology	393-446
Components of the Immune System.....	393
Toll-Like Receptors (TLRs) : Key Sensors of the Innate	
Immune System	402
Antigenicity.....	408
Immunogenicity	408
B cell epitopes.....	409
T cell epitopes.....	409
Structure of antibody molecules	410
Antibody Classes	412
Antibody allotypes.....	414
Antibody idiotypes.....	415
Immunoglobulin genes.....	415
Generation of antibody diversity	416
Antibody class switching	419
Monoclonal antibodies.....	420
Hybridoma technology.....	420
Antibody engineering.....	422
MHC molecules	424
Processing and Presentation of exogenous antigen	425
Processing and Presentation of endogenous antigen	426
Cross antigen presentation	427
B cell receptors	428
T cell receptors.....	430
The complement system	432
Hypersensitivity	433
Autoimmunity	435
Immune response in malaria	437
HIV.....	439
Immune response to HIV	440
Vaccines	444
Practice Questions.....	445

UNIT-V

DEVELOPMENT OF BIOLOGY

Basic Concepts of Development	447-463
Protostome Development.....	447
Deuterostome Development.....	447
Coelom	448
Mosaic Development	449
Regulative Development.....	450
Potency.....	450
Commitment	451
Specification.....	451
Induction	451
Competence.....	452
Determination and Differentiation.....	452
Morphogens	453
Cell fate.....	454
Cell lineages.....	455
Stem cells.....	455
Genomic equivalence.....	458

Cytoplasmic determinants.....	458	ABC model of flower development.....	522
Imprinting.....	459	MADS-box proteins.....	524
Morphallaxis.....	461	Programmed cell death in plants.....	525
Epimorphosis.....	462	Practice Questions.....	528
Practice Questions.....	462		
Gametogenesis, Fertilization and Early Development in Animals.....	464-475	UNIT-VI	
Spermatogenesis.....	464	SYSTEM PHYSIOLOGY-PLANT	
Spermiogenesis.....	464	Photosynthesis.....	529-556
Oogenesis.....	465	Light Harvesting Complexes.....	531
Fertilization.....	466	Photosystems.....	534
Cell surface molecules in sperm-egg recognition		Photosynthetic pigments.....	537
in animals.....	467	Oxygen-Evolving Complex (OEC).....	539
Zygote formation.....	468	Cytochrome b6 f complex.....	539
Zygote cleavage.....	469	Q cycle.....	540
Gastrulation.....	472	Photophosphorylation.....	540
Types of cell movements during gastrulation.....	473	Inhibitors of light reaction.....	541
Germ Layer Formation.....	474	Photoprotective mechanisms in plants.....	542
Practice Questions.....	474	Dark reaction.....	542
Cell Aggregation and Differentiation in Dictyostelium.....	476-479	RuBisCO.....	543
Life cycle of <i>Dictyostelium</i>	476	Regulation of Calvin cycle.....	546
Adventures of Multicellularity in <i>Dictyostelium discoideum</i>	477	C3 Plants.....	547
Molecular Mechanisms of Aggregation in <i>Dictyostelium Discoideum</i>	478	C4 Plants.....	547
Practice Questions.....	479	Variants of C ₄ Pathway.....	550
<i>Drosophila</i> Development.....	480-487	Crassulacean Acid Metabolism (CAM) Pathway.....	551
Life Cycle of <i>Drosophila</i>	480	Photorespiration.....	553
Fertilization in <i>Drosophila</i>	481	Practice Questions.....	554
Embryonic development in <i>Drosophila</i>	481	Plant Water Relations.....	557-572
Axis specification in <i>Drosophila</i>	482	Water potential.....	557
Regulation by Dorsal Protein.....	485	Diffusion Pressure Deficit (DPO).....	558
Hox Gene Complexes in <i>Drosophila</i>	486	Water absorption in plants.....	559
Practice Questions.....	487	Ascent of Sap.....	560
Vulva Formation in <i>Caenorhabditis</i>		Transpiration.....	562
<i>Elegans</i>.....	488-493	Antitranspirants.....	562
Life cycle of <i>C. elegans</i>	488	Factors affecting the rate of transpiration.....	565
Organogenesis in <i>C. elegans</i>	489	Guttation.....	566
Cell ablation studies.....	492	Mineral nutrition in plants.....	567
Practice Questions.....	493	Criteria for essentiality of minerals.....	567
Morphogenesis and Organogenesis in Animals.....	494-507	Theories of mineral absorption in plants.....	568
Amphibian development.....	494	Photo assimilate translocation in plants.....	569
Zebrafish (<i>Danio rerio</i>) development.....	498	Practice Questions.....	572
Eye lens induction.....	502	Nitrogen Metabolism.....	573-586
Fertilization in sea urchins.....	503	Ammonification.....	573
Sex determination in animals.....	506	Nitrification.....	574
Practice Questions.....	506	Denitrification.....	574
Plant Development.....	508-528	Biological nitrogen fixation.....	574
Microsporogenesis.....	508	Nodule formation in legumes.....	578
Development of male gametophyte.....	510	Biochemistry of nitrogen fixation.....	579
Megasporogenesis.....	511	Nitrogenase.....	580
Development of female gametophyte.....	512	Nif regulon.....	581
Self-incompatibility.....	513	Nitrate assimilation in plants.....	582
Double fertilization.....	514	Amino acid biosynthesis.....	584
Embryo Patterning.....	514	Practice Questions.....	586
Establishment of Symmetry.....	515	Plant Hormones.....	587-618
Morphogenesis and Organogenesis in plants.....	516	Auxin.....	587
Organization of Shoot Apical Meristem.....	517	Auxin signal transduction pathways.....	591
Genetic Regulation of Leaf Development.....	520	Physiological effects of auxin.....	593
		Gibberellins.....	593
		Biosynthesis of Gibberellins.....	594
		GA signaling.....	595
		Physiological effects of gibberellins.....	597
		Cytokinins.....	598

Biosynthesis of Cytokinins	599	Phototropins	627
Cytokinin signaling.....	600	Zeitlupe (ZTL) family	628
Physiological effects of cytokinin.....	601	UV-B resistance 8 (UVR8)	629
Abscisic acid	602	Photoperiodism	630
Biosynthesis of abscisic acid	603	Practice Questions.....	632
ABA catabolism.....	604	Secondary Metabolites.....	633-645
ABA signaling.....	605	Terpenes	633
Physiological effects of ABA.....	605	Volatile oils	638
Leaf Senescence and Abscission.....	607	Phenolic secondary metabolites.....	639
Ethylene	607	Lignans.....	642
Ethylene Synthesis	608	Alkaloids.....	642
Ethylene signaling.....	609	Cyanogenic glycosides.....	644
Brassinosteroids	610	Practice Questions.....	644
Systemin.....	612	Stress Physiology	646-664
Jasmonic acid.....	613	Biotic stresses.....	646
Salicylic acid.....	615	Plant response against pathogens.....	647
Strigolactones.....	616	Defense mechanisms in plants	650
Practice Questions.....	617	Defence responses in plants against herbivores.....	652
Sensory Photobiology	619-632	Abiotic stresses	657
Phytochromes.....	619	Responses of plants to water stress.....	658
Cryptochromes	624	Practice Questions.....	663

NOTE : Also Read UPKAR's CSIR-UGC NET/JRF/SET Life Sciences Vol. 2

Contents

UNIT-VII SYSTEM PHYSIOLOGY–ANIMAL

Introduction to Animal Physiology	3-9	Divisions of the Brain	66
Cellular Level of Animal Physiology	3	Memory - Storage of Information.....	68
Body Fluid Compartments	3	Synapses.....	69
Constituents of Extracellular and Intracellular Fluids	4	Chemical and Electrical Synapses	69
“Homeostatic” Mechanisms of the Major Functional Systems....	6	Classification of Somatic Senses	70
Origin of nutrients in the Extracellular fluid.....	6	Position Senses and Receptors.....	72
Removal of Metabolic end Products.....	6	Sense Organs –Vision	72
Hormone Systems	7	The Human Eye	75
Control Systems of the Body	7	Sense Organs – Hearing.....	81
Blood and Circulation	10-25	Tactile Sensations or Response	83
Transportation (Circulation) in Animals	10	Thermoregulation.....	84
Blood Corpuscles (Cells).....	10	Role of the Hypothalamus in Temperature Regulation.....	89
Hemoglobin – A Respiratory Pigment.....	11	Neuronal Effectors Mechanisms	92
White Blood Cells or Leukocytes	14	Abnormalities Related to the Body Temperature	92
Human circulatory system	16	Excretory Systems	95-123
Blood Volume and Blood Volume Regulation	17	Excretory System and the Kidneys.....	95
Hematocrit (Packed Red Cell Volume).....	17	Regulation of Water and Electrolyte Balances.....	96
Agglutinins.....	18	The Nephron act as the Functional Unit of the Kidney	97
Immunity - Defense against Infectious Microbes	18	Micturition	98
What is Hemostasis?	22	Urine Formation.....	100
Platelet Repairing or Platelet Plugging	23	Diseases (Disorders) Related to the Excretory System	
Theory about Blood Coagulation.....	23	(Kidney)	101
Anticoagulants	24	Acid-base Regulation.....	112
Cardiovascular Systems	26-47	Kidney Diseases	119
Circulation in Animals	26	Other Renal Abnormalities	122
Comparative Anatomy of Heart Structure	27	Digestive Systems	124-159
Myogenic Heart and Specialized Tissue	32	The Alimentary Tract or Gastrointestinal Tract	124
Electrocardiogram (ECG) - Cardiac Arrhythmias	33	Splanchnic Circulation-Circulation in Gastrointestinal	
Cardiac Cycle.....	36	Tract	133
Blood Pressure	40	The Small Intestine	135
Heart Sound During Heart Pumping.....	41	Secretions of the Small Intestine.....	144
Neural and Chemical Regulation of All Above	43	Digestion and Absorption in the Gastrointestinal tract.....	145
Chemical (Humoral) Control of the Circulation.....	46	Absorption of Nutrients	151
Respiration in Animals	48-64	Discomfort or Disorders of GI Tract.....	154
Respiratory Organs in Animals	48	Endocrinology and Reproduction	160-218
Respiratory System in invertebrates	48	Introduction to Endocrinology	160
Respiratory System in Vertebrates.....	49	Hormones : Structure and its Type.....	161
Lungs in Bird and Mammals.....	51	Action of Hormones.....	163
Compliance of the Lungs.....	55	The Pituitary Gland and Pituitary Hormones.....	166
Pulmonary Volumes	56	The Adrenal Glands and Adrenal Hormones	168
Diffusion and Partial Pressures of Gases	57	The Thyroid Gland and Thyroid Hormones	170
Structure and functions of Respiratory Membrane.....	60	Male and Female Reproduction	172
Transport of gases in Blood and Tissue Fluids	61	Male Sex Hormones	176
Regulation of Respiration	61	The Ovarian Cycle and its Phase	180
Respiratory Center	62	Functions of Estrogens and Progesterone	183
Chemical Control of Respiration	63	Synthesis of the Estrogens and Progestins.....	183
Nervous System, Sense Organs and Thermo-		Abnormalities of Secretion by the Ovaries.....	188
regulation	65-94	Female Fertility and Contraception	189
Human Brain and Neuron	65	Pregnancy and Lactation.....	189
		Diseased or Disorders of the Endocrine and Reproductive	
		System.....	198
		Diseases of the Thyroid.....	201

Abnormalities of Adrenocortical Secretion	203
Abnormalities of Male Sexual Function	205
Practice Questions.....	208

UNIT-VIII INHERITANCE BIOLOGY

Mendelian Principles and their Extensions	219-240
Allele.....	219
Allelomorph	220
Pseudoalleles.....	220
Isoalleles	220
Genocopy	220
Phenocopy.....	221
Mendelian principles of heredity	223
Incomplete Dominance	223
Codominance	224
Linkage	226
Linkage Groups.....	228
Linkage Drag	229
Crossing Over	229
Sex Linked Inheritance	230
Multiple Alleles.....	233
Pleiotropy.....	234
Complementation Tests.....	235
Genomic Imprinting.....	235
Gene Interactions	236
Practice Questions.....	238
Gene Mapping Methods	241-252
Linkage Maps.....	241
Two-point Cross Mapping	241
Three-point Cross Mapping	242
Tetrad Analysis.....	244
Development of Mapping Population in Plants	250
Practice Questions.....	251
Extra Chromosomal Inheritance	253-259
Reciprocal Crosses.....	253
Inheritance of Mitochondrial Genes	253
Protein-Coding Genes in Mitochondria	254
Cytoplasmic Male Sterility in Plants	254
Inheritance of Chloroplast Genes.....	255
Maternal Effect Inheritance	258
Practice Questions.....	259
Microbial Genetics.....	260-270
Horizontal Gene Transfer.....	260
Methods of Genetic Transfer in Bacteria	260
Mapping Bacterial Genes by Interrupted Mating	268
Practice Questions.....	270
Human Genetics.....	271-281
Pedigree Analysis.....	271
LOD Score for Linkage Testing.....	276
Human Karyotype.....	277
Genetic Disorders.....	278
Practice Questions.....	280
Quantitative Genetics	282-289
Polygenic Inheritance.....	282
Broad-sense Heritability (H^2).....	286
Narrow-sense Heritability (h^2).....	287
QTL Mapping	288
Practice Questions.....	289

Mutation	290-311
Causes of Mutations.....	290
Mutagens.....	291
Point Mutations	296
Site-directed Mutagenesis.....	299
Structural Alterations of Chromosomes.....	301
Numerical Alterations of Chromosomes.....	305
Practice Questions.....	310
Recombination	312-322
Homologous Recombination	312
Non-homologous Recombination	316
Transposition	317
Cre-Lox System	319
FLP/FRT System.....	321
Practice Questions.....	322

UNIT-IX DIVERSITY OF LIFE FORMS

Principle and Methods of Taxonomy.....	323-334
Concepts of species and hierarchical taxa	323
Nomenclature: ICBN & ICZN.....	324
Classification in Biology.....	325
Phenetic and Phylogenetic Principles of Classification	327
Purpose of an Outgroup	331
Characteristics of Sister Taxa.....	333
Levels of Structural Organization	335-352
Amoeba.....	336
Chlamydomonas	338
Volvox	341
Types of Epithelial Tissue	343
Connective Tissue	343
Muscle Tissue	345
Nervous Tissue	346
Comparative Anatomy, Adaptive Radiation, Adaptive Modification.....	350
Adaptive Radiation	351
Outline Classification of Plants, Animals & Micro-organisms.....	353-380
Historical Background of Classification	353
Artificial System of Classification	354
Natural System of Classification.....	354
Phylogenetic System of Classification.....	354
Categories of Classification	354
Kingdom Monera	355
Kingdom-Protista	356
Kingdom-Fungi.....	358
Kingdom-Plantae	359
Architectural Pattern of Animals	362
Classification of Animals	364
Phylum-Protozoa.....	365
Phylum Porifera	367
Affinities, Origin and Systematic Position of Porifera	369
Phylum-Coelenterata.....	370
Phylum Platyhelminthes	371
Phylum-Nematoda	371
Phylum-Annelida	372
Phylum-Arthropoda	373
Phylum-Mollusca.....	375
Phylum-Echinodermata.....	376

Phylum-Chordata	378	Relationship between Generation time and Body size	433
Natural History of Indian Subcontinent	381-389	Survivorship Curves.....	433
Geographic Origins and Migrations of Species:	384	Reproduction Strategies in Population.....	434
Geographic Origins of Species	384	Growth Models	435
Migration of Species	385	Population Regulation.....	439
Conclusion	386	Metapopulation	440
Common Indian Mammals	387	Types of Metapopulations.....	441
Common Indian Birds.....	387	Community Ecology, Ecological Succession	
Conclusion	388	and Ecosystem	443-471
Organisms of Health & Agricultural Importance		What is Community Ecology?	443
and their Conservation	390-408	Community Composition.....	443
Common Parasites and Pathogens of Humans, Domestic		Community Concepts.....	444
Animals and Crops.....	390	Characters of a Community	444
Types of Pathogen.....	391	Function of Species in a Community.....	445
Common Parasites of Domestic Animals	392	Community Services.....	446
Common Parasites of Crops.....	393	Ecological Succession.....	449
Concept of Species and Species Diversity	393	Terms in Ecological Succession.....	449
Key Components of Species Diversity	394	Types of Ecological Succession.....	450
Conservation Efforts	394	Steps in Succession	451
The IUCN Red List.....	395	Ecological Succession Models.....	452
Rare and Endangered Species.....	395	Ecosystem	453
Conservation Strategies	397	Size of Ecosystem	455
Animal Status under Wildlife Protection Act-1972	399	Types of Ecosystems.....	455
Practice Questions.....	402	Function of an Ecosystem.....	456
		Biomass Production	457
		Food Chain.....	459
		Food Web	459
		Ecological Pyramid.....	461
		Nutrient Cycling.....	462
		Biogeochemical Cycles.....	464
		Carbon Cycle	466
		Nitrogen Cycle	467
		Phosphorous Cycle.....	469
		Sulfur Cycle	470
		Applied Ecology	472-492
		Environmental Pollution	472
		Ozone (O ₃)	473
		Greenhouse Effect.....	474
		Global Warming	474
		Kyoto Protocol.....	476
		Antarctic Ozone Hole	476
		The Montreal Protocol	477
		Acid Rain	477
		Water Pollution	478
		Biological Oxygen Demand (BOD) and Chemical	
		Oxygen Demand (COD)	480
		Bioaccumulation	481
		Bioconcentration	481
		Biomagnification.....	481
		Eutrophication.....	482
		Bioremediation.....	484
		Phytoremediation	485
		Introduction to Biodiversity.....	486
		Levels of Biodiversity.....	486
		Gradients and Magnitude of Biodiversity	487
		Threats to Biodiversity.....	490
		Diversity Index.....	491
		Conservation of Biodiversity	493-510
		In-situ Conservation.....	493
		Ex-situ Conservation.....	494

UNIT-X ECOLOGICAL PRINCIPLE

Introduction to the Ecology and

Environment..... 409-420

Ecology and its Scope	409
Level of Organization	410
Environment.....	411
Soil.....	411
Soil Composition	412
Water	412
Atmosphere	413
Light.....	414
Temperature	414
Adaptation.....	414
Acclimatization	415
Animal Adaptation to Thermal Stress	415
Bergmann's Rule	416
Allen's Rule.....	416
Ecological Species Concept (ESC).....	416
Ecotype	416
Ecads	417
Ecosystem Concepts	417
Ecosystem Components	417
Productivity	418
Calculations.....	419
Energy flow	420

Habitat and Niche..... 421-426

Ecological Niche Concept.....	421
Different Experiments for Niche Concept	421
Niche Width	423
Niche Overlap	424
Resource Partitioning/Differentiation	426

Population Ecology..... 427-442

Characteristics of Populations.....	427
Calculating Population size over time	428
Metapopulation (Patches Population).....	429
Population Dispersion or Patterns of Population Dispersion ...	431

Biodiversity Hotspot	495
Biodiversity Hotspots in India	495
Red Data Book	496
Altruism	496
Inclusive Fitness	497
Hamilton's Rule and Kin Selection	497
Reciprocal Altruism	499
Mating Systems	500
Imprinting	501
Practice Questions	503

UNIT-XI EVOLUTION AND BEHAVIOR

The Evolutionary Biology and Emergence of Evolutionary Thoughts	511-521
Emergence of Evolutionary Thoughts	511
Pioneer Evolunist that Change the Path of Evolutionary Thoughts	512
Empedocles (492-432 C.E.)	512
Aristotle (384-322 C.E.)	512
St. Augustine (353-430 A.D.)	512
Evalutionists before Darwin	512
Buffon and Linnaeus	512
Erasmus Darwin (1731-1802)	513
Jean-Baptiste Lamarck (1744-1829) and Lamarckism	513
Geoffrey St. Hillaire (1772-1844)	514
Darwin (February 12, 1809 – April 19, 1882) and Darwinism	514
Darwin's Finches	515
The Origin of Species	515
Alfred Russel Wallace (1823-1913)	517
T.H. Huxley (1825-1895)	517
Neo-Darwinism (Modern Synthesis)	517
Motoo Kimura and the Neutral Theory of Molecular Evolution	518
Mendelism and Evolution	518
Theories of Evolution Based on Essentialism and Population Thinking Essentialism	519
Variation and Population Thinking	520
Evolution Today	520
Origin of Cells and Unicellular Evolution	522-534
Origin of Basic Biological Molecules	522
Theories of Origin of Life	522
Concept of Oparin and Haldan	525
Abiotic Synthesis of Organic Monomers and Polymers	527
From Monomers to Polymers	527
Sydney F. Fox's Experiments	528
Microspheres	528
Sea as the Hot Dilute Soup	528
Coacervates	529
Protinospheres	529
Formation of Nucleic Acids	529
Origin of Primitive Living Organism	530
Origin of Primary Organisms	530
Modes of Nultitions	530
The First Cells as Eobionts or Protobio	531
Evolution of Prokaryotic and Eukaryotic Cells	531
Oxygen Revolution	533
Paleontology and Evolutionary History	535-554
The Evolutionary Time Scale	535
Punctuated Equilibria	536
Radiometric Dating	537

Plate Tectonics	537
The Fossil Record	539
Major Events in the Evolutionary Time Scale	541
The Life of Cambrian Period and Animal Diversity	543
The Life of Paleozoic Era	544
The Life of Mesozoic Era	547
The Life of Cenozoic Era	548
The Primate (Homo) Evolution	552
Molecular Evolution	555-570
Concepts of Neutral Evolution	555
Molecular Divergence and Molecular Clocks	558
Molecular Tools in Phylogeny, Classification and Identification	561
Origin of New Genes and Proteins	564
The Mechanisms	571-605
Definition of Population	571
Population Genetics	573
Population Taxonomy	575
Population Structure	576
Gene Pool and Gene Frequency	576
Hardy-Weinberg Law or Hardy-Weinberg Equilibrium	578
Migration	581
Random Genetic Drift	581
Adaptation and Adaptive Radiation	582
Isolating Mechanisms	587
Geographical or Allopatricity and Sympatricity	589
Speciation	589
The Superspecies	590
Sympatric Speciation	591
Parapatric Speciation	593
Convergent Evolution	593
Sexual Selection	594
Sex Ratios	599
Coevolution	605
Brain, Behavior and Evolution	606-642
Brain and Behaviour	609
Limbic System and its Functions	611
Methods or Approaches Associated in Ethology	612
Eusocial Animals	613
Social Organisation Primates	614
Migration	616
Orientation	619
Kinesis	620
Artificial Selection	621
Parent-offspring Conflict	623
Group Selection	625
Species Interactions	626
Coevolution	629
Aposematism and Mimicry	631
Practice Questions	635

UNIT-XII APPLIED BIOLOGY

Microbial Fermentation and Production of Small and Macro Molecules	643-655
Fermentation by Microbial including Bacteria, Yeast and Fungi	643
Antibiotics and Pharmaceuticals	644
Organic Acid Production	647
Fermentation Media	647
Microbial Production of Vitamin	649
Commercial Production	651

Microbial Production of Proteins.....	652	Life.....	724
Industrial Production of Ethanol.....	654	Molecular Markers Top of Form.....	726
Tissue and Cell Culture Methods for Plants and Animals	656-666	Methodology for DNA Sequencing	729
Plant Tissue Culture or Micropropagation.....	656	Chromatin Immunoprecipitation.....	731
Stages of Micropropagation.....	656	Dna Microarray	731
Callus Culture	658	Histochemical and Immunotechnique	734-742
Somatic Embryogenesis.....	659	Immunoprecipitation.....	734
Synthetic Seeds/Artificial Seeds/Somatic Seeds.....	659	Radial Immunodiffusion	735
Somaclonal Variation	662	Double Immunodiffusion (Ouchterlony).....	735
Somatic Hybridization	662	Agglutination	736
Cybrids.....	663	Coombs Test.....	736
Animal Cell Culture.....	663	Enzyme-linked Immunosorbent Assay (ELISA)	737
Transgenic Animals and Plants and Genomics	667-687	Immuno-electrophoresis.....	739
Transgenic Animals.....	667	Monoclonal Antibodies (mAb)	741
Techniques for Mass Culture of Animal Cell Lines.....	668	Biophysical Method	743-750
Methods for Gene Transfer into Plant Cells	672	Spectroscopy	743
Selectable Marker Genes	675	Types of Spectroscopy	744
Gene Knockout	679	UV/Vis Absorption Spectroscopy	746
Bioresources.....	684	IR Absorption Spectroscopy	746
Bioremediation and Biosensors	688-704	Nuclear Magnetic Resonance (NMR).....	747
Bioremediation.....	688	Magnetic Resonance Imaging (MRI).....	747
Phytoextraction	689	Raman Spectroscopy.....	748
Phytostabilization.....	690	Circular Dichroism.....	748
Phyotransformation.....	690	Microscopic Technique	751-761
Biosensors.....	691	Microscopy	751
Stem Cells.....	693	Light Microscope	751
Types of Stem Cells	694	Electron Microscopy.....	754
Marker-Assisted Selection (MAS)	697	Atomic Force Microscopy (AFM).....	756
Practice Questions.....	701	Flow Cytometry	757
		Statistical Method	762-772
		Measurement of Central Tendency	762
		Measures of Dispersion.....	763
		Correlation and Regression.....	764
		Test of Statistical Significance	765
		Standard Error of Mean	767
		Analysis of Variance (Anova).....	770
		Electrophysiological Methods	773-790
		Single Neuron (unit) Recording.....	773
		Physiological Methods.....	773
		Patch Clamp Technique	773
		Fret and Frap.....	776
		Frap	777
		Electroencephalography (EEG): Exploring Brain Activity and Clinical Applications.....	778
		Computed Tomography (CT) Scan.....	780
		Practice Questions.....	782

UNIT-XIII

METHODS IN BIOLOGY

Molecular Biology and Recombinant DNA

Methods	705-733
Isolation and Purification of RNA and DNA	705
Blue Native-PAGE (BN-PAGE)	711
Immunoblotting.....	711
Molecular Cloning	713
Genetic Engineering for Human Welfare	715
Heterologous Protein Production	717
Yeast Artificial Chromosomes (YACs): Cloning Large DNA Fragments	723
Protein Sequencing: Deciphering the Building Blocks of
